ABOUT ME

I am a Software Engineer with three years of experience in front-end development. I build responsive and clean user interfaces using HTML, CSS, JavaScript, and Bootstrap. Currently, I am learning React.js to create more dynamic and efficient web applications.

EDUCATION

Palestine University | 2019-2025

Bachelor's Degree in Software Engineering

Cumulative GPA: 88.6 – Class of 2024

During my studies, I developed strong skills in software development, problem-solving, and building practical applications. My graduation project, ***“Online Payment Fraud Detection Using Machine Learning,”** was developed using Python and focused on detecting fraudulent transactions through data analysis and predictive modeling. The project demonstrated my ability to work with datasets, apply machine learning algorithms, and build intelligent systems that address real-world challenges.

WORK EXPERIENCE

Front-End Development Experience

I have developed a wide range of front-end projects as part of my applied training and continuous learning. Through a professional Front-End Development course, I gained strong practical experience in HTML, CSS, JavaScript, and Bootstrap, building responsive and user-focused interfaces.

Currently, I am enhancing my technical skills by learning React.js and converting my previous projects into React-based applications. This transition is strengthening my ability to create modern, scalable, and maintainable user interfaces that meet current industry standards.

SKILLS

- Creativity in interface design
- Strong attention to detail
- Ability to learn new technologies quickly
- Team communication
- Analytical thinking
- Time management
- Creativity in interface design
